

HUSH CITY

the app to map and find quietness around you

WELCOME TO THE HUSH CITY APP!

With this app, you are an active part of a citizen science project to map quietness in cities.

Our cities are becoming increasingly noisier by the hour. In Europe, over 125 million people are affected by noise pollution from traffic every year, and quietness is becoming a luxury available only to a few of us.

By using Hush City, you will contribute to making quietness available to all those who appreciate it!

Join the community. It is simple.

- Download the app!
- Go to one of your favorite quiet spots
- Record the sound where you are in the quiet spot
- Take a picture of the spot where you recorded the sound
- Answer the questionnaire about this quiet spot
- Share this information with your community.

Or, use the app to find a quiet spot near to you. Go there and enjoy spending some time there.

CREDITS & ACKNOWLEDGMENTS

The Hush City app is part of the research project: "Beyond the Noise: Open Source Soundscapes", currently under development by Dr. Antonella Radicchi at Technical University of Berlin.

Project Supervisors: Professor Dr. Dietrich Henckel (Technical University of Berlin), M.A. Jörg Kaptain (Berlin Senate, Senate Department for the Environment, Transport and Climate Protection).

Software Development of the HUSH CITY app: QUERTEX GmbH, in cooperation with EdgeWorks Software, Ltd.

The project: "Beyond the Noise: Open Source Soundscapes" has received funding from the IPODI-Marie Curie Fellowship – People Programme (Marie Curie Actions) of the European Union's Seventh Framework Programme (FP7/2007-2013) under REA grant agreement no. 600209 (TU Berlin/IPODI).
